TROPICAL CYCLONE BULLETIN NO. 17 Typhoon "ODETTE"

Issued at 8:00 AM, 17 December 2021 Valid for broadcast until the next bulletin at 11:00 AM today

"ODETTE" IS NOW PASSING OVER THE SULU SEA BETWEEN CUYO AND CAGAYANCILLO ISLANDS

Location of Center (7:00 AM)

The center of the eye of Typhoon "ODETTE" was located based on all available data at 155 km West Southwest of Iloilo City or 90 km South Southeast of Cuyo, Palawan (10.1°N, 121.3°E)

Intensity

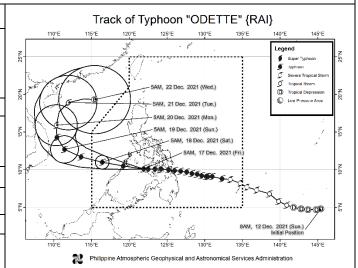

Maximum sustained winds of 155 km/h near the center, gustiness of up to 235 km/h, and central pressure of 955 hPa

Present Movement

Westward at 25 km/h

Extent of Tropical Cyclone Winds

Strong winds or higher extend outwards up to 480 km from the center

TRACK AND INTENSITY FORECAST

	Center Position			Intensity		Movement
Date and Time	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)
12-Hour Forecast 5:00 PM 17 December 2021	10.5	119.2	Over the coastal waters of San Vicente, Palawan	150	TY	W 25
24-Hour Forecast 5:00 AM 18 December 2021	11.0	116.4	250 km East of Pag-asa Island, Kalayaan, Palawan	140	TY	W 25
36-Hour Forecast 5:00 PM 18 December 2021	11.7	113.6	95 km Northwest of Pag-asa Island, Kalayaan, Palawan (outside the PAR)	150	TY	WNW 25
48-Hour Forecast 5:00 AM 19 December 2021	12.7	111.4	350 km West Northwest of Pag-asa Island, Kalayaan, Palawan (outside the PAR)	150	TY	WNW 20
60-Hour Forecast 5:00 PM 19 December 2021	14.3	110.4	545 km Northwest of Pag-asa Island, Kalayaan, Palawan or 1,070 km West of Central Luzon (outside the PAR)	120	TY	NNW 15
72-Hour Forecast 5:00 AM 20 December 2021	15.9	110.3	1,075 km West of Northern Luzon (outside the PAR)	95	STS	N 15

TROPICAL CYCLONE BULLETIN NO. 17 Typhoon "ODETTE"

Issued at 8:00 AM, 17 December 2021 Valid for broadcast until the next bulletin at 11:00 AM today

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

- Today: Heavy to torrential rains over Western Visayas, Palawan including Calamian, Cuyo, and Cagayancillo Islands, and Negros Oriental. Moderate to heavy with at times intense rains over the Bicol Region, Zamboanga Peninsula, Quezon, and the rest of MIMAROPA. Light to moderate with at times heavy rains over the Metro Manila, Cagayan Valley, Cordillera Administrative Region, Caraga, Northern Mindanao, Aurora, Lanao del Sur, and the rest of Visayas,
- **Tomorrow:** Heavy to torrential rains over Kalayaan Islands. Moderate to heavy rains over Catanduanes, Camarines Provinces, Quezon, and Aurora. Light to moderate with at times heavy rains over Cagayan Valley, Cordillera Administrative Region, Metro Manila, Eastern Visayas, Rizal, Bulacan, mainland Palawan including Calamian Islands, and the rest of Bicol Region.
- Under these conditions, scattered to widespread flooding (including flash floods) and rain-induced landslides are expected
 especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps, and in localities with
 significant antecedent rainfall.

Severe Winds

- **Destructive** typhoon-force winds will be experienced within any of the areas where TCWS #3 is in effect. This may bring moderate to heavy damage to structures and vegetation.
- **Damaging** winds reaching gale- to storm-force strength will be experienced within any of the areas where TCWS #2 is in effect. This may result in generally light to moderate damage to structures and vegetation.
- Strong winds (strong breeze to near gale) with higher gusts will be experienced within any of the areas where TCWS #1 is currently in effect during the passage of the typhoon. This may generally bring up to very light damage to structures and vegetation.

Coastal Inundation

There is a **moderate to high risk of storm surge** of up to 3.0 m in height in the next 24 hours which may cause life-threatening flooding in the low-lying coastal areas of Negros Provinces, Iloilo, Antique, Guimaras, and several localities in the northern portion of Palawan (including Calamian, Cuyo and Cagayancillo Islands).

HAZARDS AFFECTING COASTAL WATERS

- In the next 24 hours, moderate to very high seas (1.2 to 10.0 m) will be experienced over the seaboards of areas where TCWS is in effect (especially in the open sea areas). **These conditions are risky for all types of sea vessels.** Mariners are advised to remain in port or take shelter in port until winds and waves subside.
- Under the influence of Typhoon "ODETTE" and the prevailing Northeast Monsoon, a **Gale Warning remains in effect** for several coastal waters not under any wind signal, specifically the seaboards of Northern Luzon, and the eastern seaboard of the country. For more information, refer to Gale Warning #51 (Intermediate) issued at 8:00 AM today.
- In the next 24 hours, moderate to rough seas (1.2 to 3.1 m) will also prevail over the remaining seaboards of the country that are not under any wind signal. **These conditions are risky for those using small seacrafts.** Mariners are advised to take precautionary measures when venturing out to sea and, if possible, avoid navigating in these conditions.

TRACK AND INTENSITY OUTLOOK

- Moving generally westward, the typhoon is forecast to make landfall in the vicinity of northern or central portion of Palawan this
 morning or afternoon, re-emerge over the West Philippine Sea tonight, and pass in the vicinity of Kalayaan Islands tomorrow. The
 typhoon is forecast to exit the Philippine Area of Responsibility tomorrow morning or early afternoon.
- "ODETTE" may still see some slight weakening until it crosses Palawan, but it is forecast to remain as a typhoon. Re-intensification is likely once "ODETTE" emerges over the West Philippine Sea. However, continuous weakening may ensue beginning Sunday as the typhoon becomes exposed to increasing vertical wind shear and the surge of the Northeast Monsoon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 11:00 AM today.
